MATH-O-STRING

Description-

String art is a graphic art form with its roots in Mary Everest Boole's "curve-stitching." It became popular as a mode of visual expression in the 1970's, when artists began to use it to create increasingly complex figures. The basis of all string art, though, is one of the main ideas in calculus, that is the use of straight lines to represent curves. String art, or pin and thread art, is characterized by an arrangement of colored thread strung between points to form geometric patterns or representational designs.
